

ANNUAL SALES REPORT

NovaTech Solutions Pvt. Ltd.

Synthetic Dataset for Agentic RAG Development

Reporting Period: January 1, 2025 – December 31, 2025

Source dataset: 100,000 synthetic sales transactions

This report is intentionally generated from the accompanying CSV dataset so that both structured SQL analysis and unstructured document retrieval can be tested against the same annual sales information.

1. Executive Summary

In 2025, NovaTech Solutions Pvt. Ltd. recorded 100,000 sales transactions covering 299,870 units. Total recognized net sales were █11,041,502,226, generating █3,698,538,896 in profit at an overall margin of 33.50%.

Metric	Annual Result
Transactions	100,000
Units Sold	299,870
Gross Sales	█12,643,414,748
Net Sales	█11,041,502,226
Profit	█3,698,538,896
Profit Margin	33.50%
Average Transaction Value	█110,415
Best Month	March (█1,008,688,388)
Top Region	West (█3,295,425,214)
Top Product	Enterprise Suite (█3,394,090,021)

Key observation: March was the strongest sales month. West was the highest-value region, while Enterprise Suite generated the largest product-level contribution.

2. Monthly Sales Performance

The following table provides a complete month-by-month view of the annual sales dataset. It is useful for testing Agentic RAG questions involving time filtering, trend analysis, month comparisons, and retrieval of specific monthly figures.

Month	Transactions	Units	Net Sales	Profit	Margin
January	8,514	25,542	■854,440,508	■285,513,929	33.42%
February	7,656	23,218	■800,477,885	■268,672,111	33.56%
March	8,493	25,451	■1,008,688,388	■337,283,262	33.44%
April	8,281	24,832	■911,673,053	■304,749,610	33.43%
May	8,449	25,319	■950,428,910	■316,135,352	33.26%
June	8,115	24,209	■952,898,479	■320,423,013	33.63%
July	8,505	25,426	■861,638,736	■288,583,411	33.49%
August	8,499	25,569	■861,520,604	■290,494,846	33.72%
September	8,335	24,974	■987,815,571	■331,480,654	33.56%
October	8,526	25,555	■945,261,649	■318,078,395	33.65%
November	8,112	24,222	■902,246,631	■302,432,596	33.52%
December	8,515	25,553	■1,004,411,812	■334,691,718	33.32%

3. Regional Sales Analysis

West was the strongest region by net sales. Regional performance is intentionally included so that the SQL agent can answer questions such as "Which region generated the highest sales?" or "Compare West and South sales."

Region	Transactions	Net Sales	Profit	Margin
West	30,049	■3,295,425,214	■1,101,864,061	33.44%
North	21,986	■2,414,424,171	■809,117,449	33.51%
South	21,036	■2,337,727,112	■784,116,117	33.54%
East	16,860	■1,865,306,771	■624,862,037	33.50%
Central	10,069	■1,128,618,958	■378,579,233	33.54%

Regional dimensions in the CSV include West, North, South, East, and Central. Each transaction also contains city-level information, enabling more granular analysis.

4. Product & Category Performance

Enterprise Suite was the highest-selling product by recognized net sales. The product dimension is designed to support RAG questions that require combining product names, categories, transaction counts, units, revenue, and profitability.

Product	Category	Transactions	Units	Net Sales	Profit
Enterprise Suite	Enterprise Software	15,148	45,178	■3,394,090,021	■1,137,690,984
AI Analytics	AI & Analytics	13,909	41,816	■1,956,329,522	■654,927,751
Data Platform	Data & Analytics	15,958	47,866	■1,592,988,191	■533,411,977
CyberShield	Cybersecurity	12,916	38,817	■1,533,091,282	■512,534,164
Cloud Pro	Cloud Services	17,996	53,938	■1,016,972,064	■341,403,560
API Gateway	Platform Services	12,173	36,586	■995,558,322	■334,031,841
Managed Support	Support Services	11,900	35,669	■552,472,825	■184,538,620

5. Sales Channel Analysis

The dataset contains Direct, Partner, Online, and Enterprise channels. Channel analysis can be used to test questions involving channel contribution, profitability, and comparisons between direct and indirect sales.

Sales Channel	Transactions	Net Sales	Profit	Margin
Direct	34,175	■3,764,285,904	■1,259,106,935	33.45%
Enterprise	24,856	■2,740,345,410	■919,716,503	33.56%
Partner	22,976	■2,545,869,022	■852,079,240	33.47%
Online	17,993	■1,991,001,891	■667,636,219	33.53%

The leading channel by net sales was Direct, contributing ■3,764,285,904 during the reporting year.

6. Customer Segment Analysis

Sales are divided into SMB, Mid-Market, and Enterprise customer segments. Enterprise transactions intentionally have higher average order values, allowing the dataset to support realistic segmentation and profitability questions.

Customer Type	Transactions	Net Sales	Profit	Margin
Mid-Market	34,895	■4,076,757,159	■1,366,262,471	33.51%
Enterprise	22,826	■3,636,999,769	■1,214,769,010	33.40%
SMB	42,279	■3,327,745,298	■1,117,507,416	33.58%

The customer_id field represents synthetic customer identities and can be used for repeat-customer, customer-level, and transaction-frequency analysis.

7. Transaction Status & Payment Analysis

Transaction status and payment method are included to create additional structured dimensions for the Agentic RAG system. Cancelled and returned transactions have zero recognized net sales and profit in the dataset.

Transaction Status

Status	Transactions	Net Sales
Completed	95,976	■11,041,502,226
Returned	2,536	■0
Cancelled	1,488	■0

Payment Method

Payment Method	Transactions	Net Sales
UPI	27,743	■3,068,554,402
Credit Card	24,168	■2,688,959,985
Bank Transfer	22,097	■2,435,485,171
Debit Card	14,050	■1,536,250,623
Net Banking	11,942	■1,312,252,046

8. Dataset Dictionary & Agentic RAG Use

The CSV is deliberately structured so the SQL agent can perform aggregation, filtering, grouping, date analysis, ranking, and calculations. The PDF contains annual narrative and summary information about the same business, making it suitable for vector retrieval.

Column	Meaning
transaction_id	Unique synthetic transaction identifier
transaction_date	Date of transaction
customer_id	Synthetic customer identifier
customer_type	SMB, Mid-Market, or Enterprise
region / city	Geographic sales location
sales_channel	Direct, Partner, Online, Enterprise
product	Product sold
product_category	Product grouping
quantity	Units sold
unit_price_inr	Unit price in INR
gross_sales_inr	Gross transaction value
discount_pct	Discount percentage
discount_amount_inr	Discount value in INR
net_sales_inr	Recognized sales after discount
cost_inr	Synthetic cost basis
profit_inr	Net sales minus cost
profit_margin_pct	Profit as percentage of net sales
payment_method	Payment mechanism
transaction_status	Completed, Returned, or Cancelled
salesperson_id	Synthetic salesperson identifier

9. Agentic RAG Test Scenarios & Appendix

Use the following questions to validate the Planner, SQL tool, Vector Search tool, Reasoner, Checker, and retry loop. Questions marked SQL should exercise structured query generation, while Vector/PDF questions should exercise document retrieval.

Test Question	Expected Primary Source
What was total net sales in 2025?	SQL + PDF
Which month had the highest sales?	SQL + PDF
Which region generated the most revenue?	SQL + PDF
Which product generated the highest net sales?	SQL + PDF
Compare West and South regional sales.	SQL
What was the profit margin in December?	SQL + PDF
Which sales channel generated the most profit?	SQL + PDF
What percentage of transactions were returned?	SQL
Which customer segment generated the most revenue?	SQL + PDF
What were the company's annual sales highlights?	Vector/PDF
Summarize the 2025 sales performance.	Vector/PDF
Compare annual sales performance across regions.	SQL + PDF
What product category performed best?	SQL + PDF
Why might Q4 appear stronger than Q1?	SQL + PDF + Reasoning

Important: This is synthetic data created specifically for software development, RAG evaluation, demonstrations, and testing. It does not represent a real company or real financial records.

Files generated: sample_company_sales_2025_100k.csv and sample_company_annual_sales_report_2025_10_pages.pdf
